

Reading Assignment

1. Assignment Overview

As part of your ongoing learning, you are required to read articles from a provided list every two weeks.

2. Grading: For each article you read and successfully complete the associated tasks (summary and quiz), you will earn a 5% credit on your final grade. The credit will be discounted if no efforts are made to prove the human reading (e.g., contents copied and pasted from the original article; or AI-generated summary which would be similar for many students).

3. Assignment Requirements

- Article List: A list of articles will be provided. Each student will pick one article to read at the beginning of each two weeks.
- Preparing reading notes: Each student will write a summary or reading notes (with your discussion or extension on the article) before the due date.
- Preparing Quiz: Each student will prepare 5 questions based on the articles before the due date.
- Prepare Answers for the quiz questions.

4. Submission (every two weeks)

- **Submit a Reading Notes:** Cite the article you read. Write a summary (200-500 words) and your notes of the article to demonstrate your understanding.
- **Submit Quiz Questions with Answers:** Complete a short quiz (with 5 open questions) with answers related to the article content.
